

Dear Sir/Madam

**Trident Crisis Solutions** is a group of professional consultants from Fire & Rescue, Police, the Health Sector, Military, Local Authority and Media Specialists that are ready to support your requirements. As the founder and Director of the company I am committed to ensure the services we deliver to you are supported by the appropriate level of training and underpinning knowledge. As a Member of the Emergency Planning Society (EPS), the Business Continuity Institute (Bsi), the Institute of Fire Engineers (FireE) and trained to a standard of 'Preparing to Teach in Life Long Learning Sector (PTLLS) I am supported by mechanisms to ensure the appropriate standards are maintained; my colleagues all have identical and or similar qualifications relevant to their areas of speciality.

Over the past 14 years I personally have been responsible for the delivery of the off-site emergency planning, testing and exercising arrangements within the County for the Control of Major Accident Hazards Regulations (**COMAH**) 2005, the Pipeline Safety Regulations (**PSR**) 1996 and the Radiation Emergency Preparedness & Public Information Regulations (**REPPiR**) 2001.

Within the Service I developed and managed the Business Continuity Management arrangements and processes to the British Standard 25999 Parts I & II and then to ISO 22301. More recently, several members of the team, including myself have worked on a high profile Emergency Management Improvement Programme within the nuclear industry.

As a former senior Fire Commander with over 31 years of experience and serving for a busy Metropolitan Fire & Rescue Service, I am able call upon a vast wealth of experiences in operational incident command. Furthermore, this is enhanced by the additional bespoke roles I performed, namely; Chemical, Biological, Radiological, Nuclear and conventional explosives (**CBRNe**) Commander, Hazardous Materials and Environmental Protection Officer with additional functionality of the Detection, Identification and Monitoring role, and the niche role Inter-agency Liaison Officer.

With the combination of support mechanisms, the level of experience and the roles the team have performed throughout their extensive careers, we are able to offer to you the assurance you need.

*Steve Thomas*
